Web Filtering Solution

Download a **FREE** Trial at
www.currentware.com

- ✓ **Block offensive websites**
- ✓ **Allow authorized websites**
- ✓ **Restrict disruptive software (chats, games)**
- ✓ **Block unapproved downloads (video, exe)**
- ✓ **Compatible with all major browsers**

Simply the Best Web Filtering Solution!

BrowseControl is an easy to use Internet Management program that helps control Internet access and enforces Internet usage policies across your enterprise.

✓ **URL Allowed and Blocked Lists**

The URL Allowed and Blocked lists, enable you to add additional websites to complement the URL Category Filtering. The Allowed List, permits access to URLs that would normally be restricted if it is part of a blocked category. Conversely the Blocked List will restrict access to a site.

✓ **URL Category Filtering**

Customize internet usage by blocking offensive sites from an extensive selection of 100 URL categories.

✓ **Scheduler**

Schedule unrestricted browsing at specific times (e.g. lunch time). Or allow/block access to specific URLs at allotted times.

✓ **Multiple Consoles**

Install separate consoles in each department/classroom, to allow the

✓ **Application Blocking**

Prevent users from activating unauthorized software: games, chats and media players.

✓ **Block Personal Emails**

Block user access to personal email via gmail, yahoo mail, hotmail etc. to ensure that no security threats are bypassed, and increase employee productivity.

✓ **Offsite Internet Control**

BrowseControl polices such as allow/block lists and application blocker settings can be configured to offsite laptops.

✓ **Port Filtering/Block Downloads**

Restrict the downloading of unsolicited files such as video, audio, exe formats to protect your network from malicious files.

✓ **User or Computer Based Policies**

Internet restriction policies can be

Windows 7, 8, 10
Windows Server 2008, 2012

"BrowseControl is a simple solution to a serious problem. We found it remarkably easy to install and configure and the levels of control it provides, are very extensive and can be customized to suit a wide range of network environments"

- Network Computing

"After looking at other software that told me what I wanted to hear but didn't actually deliver, I needed something that just worked. No hassle, a remote client setup that just works – add in the allowed URL's and walk away. That's exactly what Browse Control did. Configure it on a group or per user basis – whatever way you use it -it just works."
