

- ✓ Monitor every URL visited by user or by PC
- ✓ Track the browsing activity on charts or reports
- ✓ Schedule URL tracking at particular times of the day
- ✓ Monitor the bandwidth usage of each user

**BrowseReporter is a powerful web monitoring tool that tracks the browsing activity of your employees or students. It is a non-intrusive tool, running in the background without the users knowing that their systems are being monitored.**

**BrowseReporter includes an extensive reporting utility. Reporting is available at both the executive and detail level in the form of charts and tables.**

✓ **Tracking and Reporting on Internet Access:**

Monitor web browsing activity on a per user or per computer basis with comprehensive reporting in both tabular and graphical formats.

✓ **Email Reports:**

Eliminate the manual task of regularly sitting at the BrowseReporter console, generating endless reports for your manager! Through the new Email Reports feature, you can automatically have specific reports generated and emailed to the manager/administrator on a scheduled basis.

✓ **Schedule URL Tracking:**

Collecting the Internet browsing activity at all times may not be necessary. For example administrators may be interested in tracking data only during business or school hours. The URL Tracking Scheduler provides the facility to schedule the days/times to collect browsing data.

✓ **Bandwidth Monitoring:**

Track the Internet traffic on your network, to isolate users that are congesting the organization's bandwidth.

✓ **Remote Screen Capturing:**

Monitor your users' computer activity by capturing screenshots of their computers.

✓ **Export URLs to BrowseControl:**

Once offensive or authorized sites have been identified through BrowseReporter, the next course of action would be to export this list to your Internet blocking software such as BrowseControl.

✓ **Database Archive/Restore:**

In order to maintain optimal database performance, the BrowseReporter database can now be archived. The Restore utility can easily retrieve previously archived data.

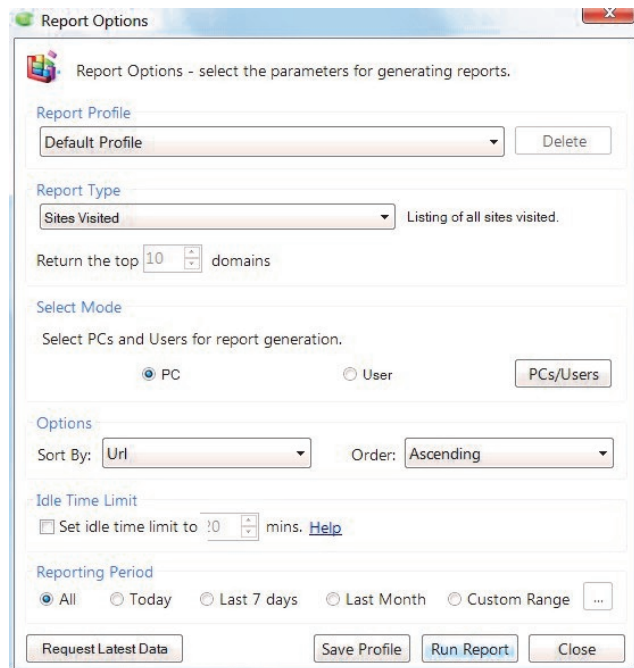

✓ **User friendly console:**

Intuitive graphical console for monitoring and reporting on browsing activity.

## Supported Operating Systems

**BrowseReporter Server/Console:**  
Windows 2000/2003/2008, XP, Vista and Windows 7

**BrowseReporter Client:**  
Windows 2000/2003/2008, XP, Vista and Windows 7

*"BrowseReporter has been great in enabling us to give feedback on which sites we need to restrict. With Bandwidth reporting and Remote Screen capturing, BrowseReporter has become the perfect tool for us to monitor our client PCs."*

## Internet abuse continues to plague the office

500 employees who have internet access at work were surveyed on web and software application usage during working hours.

Employees surveyed who admitted to personal surfing at work (50%) said they are spending 17 hours per week on average. It is estimated that approximately 85% of UK office workers have internet access at work.

According to government statistics, the average wage in the UK is £24,908. From these figures, employers are paying each employee £5,292.95 a year to browse the internet for personal reasons. Shockingly, this equates to a total loss of **£70 BILLION** a year to UK businesses.
