Mobile Device Management Made Simple!

Mobile device management has never been easier. Use CurrentWare Gateway to manage the internet policies on any mobile device, as well as desktop PCs.

CurrentWare Gateway is the ultimate safeguard against inappropriate, non-work related,

✓ No Client Installation

With CurrentWare Gateway, there is no client to install. That means you can manage all the devices on your network quickly. Even guest devices!

✓ Multi-Platform Management

If the device can connect to the internet, it can be managed by Gateway

✓ Secure Wi-Fi Hotspots

Wireless access is essential for business. Proper internet restrictions ensure that inappropriate browsing doesn't lead to security concerns

✓ URL Category Filtering

Easily block certain types of websites by making use of CurrentWare Gateway's Category Filtering. Choose from over 100 categories.

✓ Custom Allowed and Blocked Lists

Take control of your mobile device management policy by adding specific web sites you want to block or allow to their respective lists.

✓ Restrict Downloads

Secure your network one step further with the file type blocker. Ensure downloads on your network aren't using up company bandwidth.
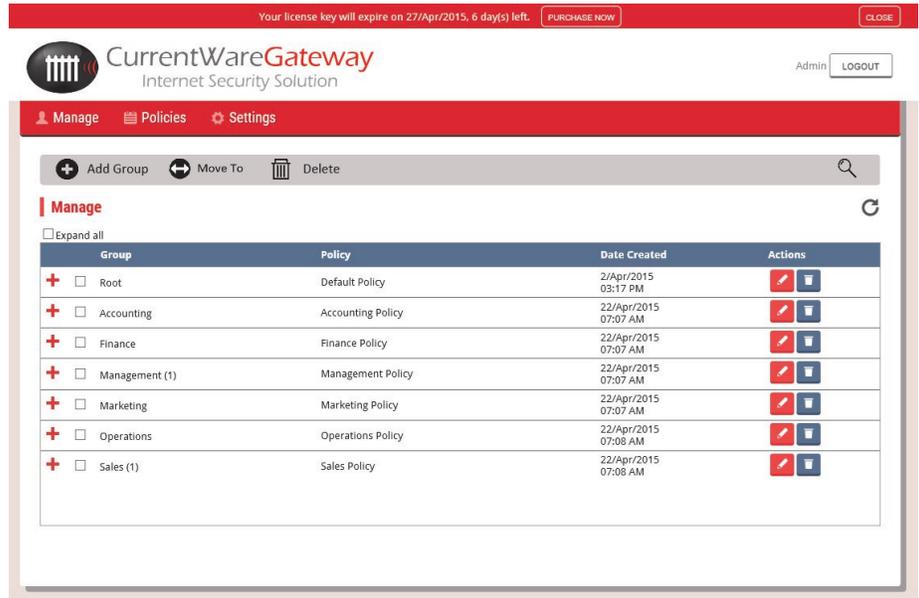

CurrentWare
